Summary

B.Tech Computer Engineering student (expected June 2027) building full-stack applications with **React.js**, **Python (FastAPI)**, **Node.js**, and **REST APIs**, with **Docker** and **Git** for delivery. Integrated **LLM APIs** (OpenAI, Gemini) and **LangChain** into applications. Won **1st place** at a National 36-Hour Hackathon for a real-time AI system, and solved **200+ problems** on LeetCode.

Technical Skills

Frontend: React.js, Next.js, HTML5, CSS3, TypeScript, Zustand, React Query
Backend & APIs: Python, FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, WebSockets, Socket.IO
AI/LLM: LangChain, OpenAI API, Gemini API, Machine Learning, YOLOv8, OpenCV
Databases: MySQL, MongoDB, SQL
AI Coding Tools: Cursor, Claude Code, Codex, OpenCode
DevOps & Tools: Docker, Git, GitHub, AWS (EC2, S3, Lambda), Linux, Postman
Core: Data Structures & Algorithms, OOP, DBMS, System Design

Experience

Software Developer Intern, NTS Nihon Global (Remote) **Jun 2025 – Jul 2025**

- Built and integrated **REST APIs** with **JWT authentication** and input validation, debugging issues across frontend and backend for reliable data exchange.
- Optimized data flow and reporting workflows in a React.js and Node.js codebase; collaborated in an **Agile/Scrum** team using Git and GitHub, contributing to sprint reviews and release documentation.

Projects

AI Traffic Management System — Python, FastAPI, React, Node.js, Socket.IO, YOLOv8 *1st Place, National Hackathon*

- Built a **real-time computer vision pipeline** (YOLOv8, OpenCV) across 4 live lanes, producing stable, sub-second vehicle counts.
- Designed a 3-tier architecture (FastAPI service, Node.js engine, React dashboard) streaming live data via Socket.IO and REST.

DocFlow Agent — Python, AI Agent, LLM *In progress*

- Building an AI agent for document workflows that applies LLM tooling to automate multi-step tasks.

LinkLoom: Real-Time Chat & Video App — React, WebSockets, JWT, Zustand, React Query

- Built a **real-time backend** with JWT authentication and WebSocket messaging, including typing indicators and read receipts.

Crowdsourced Civic Issue Reporting System — MERN, Leaflet.js, MongoDB, JWT

- Built **REST analytics endpoints** on MongoDB tracking resolution time and issue volume, with geo-tagged issue mapping.
- Designed a GPS-indexed complaint pipeline for hyperlocal auto-assignment.

Achievements & Certifications

Hackathon: 1st place, National-Level 36-Hour Hackathon (AI / Computer Vision)
Competitive Programming: 200+ DSA problems on LeetCode; 2nd prize, National-Level DSA Competition
NPTEL: Elite + Gold (Machine Learning & Deep Learning), Elite (Programming in Java)
AWS Academy: Cloud Foundations Badge (2026)

Education

Government College of Engineering, Jalgaon **Aug 2024 – Jun 2027**
B.Tech, Computer Engineering CGPA: 8.14/10

ICRE, Gargoti **Jun 2021 – May 2024**
Diploma, Computer Engineering Percentage: 80.81%
