Shivprasad Dongapure

Software Developer | Full-Stack and Backend | AI Integration

+91-8956657409 | prasaddongapure7660@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFILE

Final-year B.Tech Computer Engineering student (graduating June 2027) who builds full-stack web applications and AI-powered systems. Experienced with REST APIs, JWT authentication, real-time features, and database design across MongoDB and MySQL. Won 1st place at a national 36-hour hackathon and has solved 200+ algorithmic problems. Looking for a software developer internship in full-stack or backend engineering.

EDUCATION

Government College of Engineering, Jalgaon — Aug 2024 - Expected June 2027
B.Tech. in Computer Engineering | CGPA: 8.14 / 10

ICRE, Gargoti — Jun 2021 - May 2024
Diploma in Computer Engineering | 80.81%

EXPERIENCE

Software Developer Intern, NTS Nihon Global (Remote) — Jun 2025 - Jul 2025

- Built and integrated RESTful APIs with JWT authentication and structured validation, and debugged issues across the stack for reliable data exchange.
- Optimized data flow and reporting workflows in an existing React.js and Node.js codebase.
- Worked in an Agile/Scrum team using Git and GitHub, contributing to sprint reviews and release documentation.

PROJECTS

AI Traffic Management System — Python, YOLOv8, OpenCV, FastAPI, Socket.IO
1st place, National 36-Hour Hackathon

- Built a real-time vehicle detection pipeline with YOLOv8 and OpenCV across 4 live lanes, using a 10-frame sliding-window median to produce stable, sub-second counts.
- Designed a 3-tier architecture (FastAPI service, Node.js signal engine, React dashboard) streaming live data through Socket.IO and REST.

GitHub Profile Analyzer API — Node.js, MySQL, REST, Caching, Render

- Designed a REST API over a 4-table MySQL schema with CRUD, pagination, sorting, and filtering for repository and activity insights.
- Added 60-minute caching, force-refresh logic, and rate-limit middleware; supports batch analysis of up to 10 profiles.

Crowdsourced Civic Issue Reporting System — MERN, Leaflet.js, MongoDB, JWT

- Built MongoDB analytics endpoints tracking resolution time and issue volume, with geo-tagged mapping for local issues.
- Designed a GPS-indexed complaint pipeline for hyperlocal auto-assignment.

LinkLoom: Real-Time Chat and Video App — React, WebSockets, JWT, Zustand, React Query

- Built a real-time backend with JWT authentication and WebSocket messaging, including typing indicators and read receipts.

TECHNICAL SKILLS

Languages	Python, Java, C++, JavaScript, TypeScript, SQL
Frontend	React.js, Next.js, Zustand, React Query
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT, WebSockets, Socket.IO
Databases	MongoDB, MySQL
AI and ML	Machine Learning, Deep Learning, YOLOv8, OpenCV, LangChain, OpenAI API, Gemini API
Cloud and Tools	AWS (EC2, S3, Lambda), Docker, Git, GitHub, Linux, Postman
Core CS	Data Structures and Algorithms, OOP, DBMS, System Design

ACHIEVEMENTS AND CERTIFICATIONS

- **1st place**, National-Level 36-Hour Hackathon (AI and Computer Vision)
- **2nd prize**, National-Level DSA Competition
- **200+ DSA problems** solved on LeetCode
- **NPTEL Elite + Gold** in Machine Learning and Deep Learning; **Elite** in Programming in Java
- **AWS Academy** Cloud Foundations Badge (2026)
