Summary

Final-year B.Tech Computer Engineering student (graduating 2027) with hands-on full-stack experience across **React.js/Next.js** front-ends and **Node.js/Express.js** back-ends. Comfortable with **MongoDB/SQL** databases, **unit/integration testing**, and Git-based collaboration. Maintains a **daily practice routine** in DSA and full-stack development, continuously shipping and testing projects while expanding into **AI/ML/DL**. Proactive and confident working independently in fast-paced environments.

Education

Government College of Engineering, Jalgaon **2024 – 2027**
B.Tech in Computer Engineering *CGPA: 8.14/10*

ICRE, Gargoti **2021 – 2024**
Diploma in Computer Engineering *80.81%*

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, Django, REST APIs, WebSockets, Socket.IO, JWT Authentication, FastAPI

Databases: MongoDB, MySQL, SQL, SQLite

Programming Languages: JavaScript, Python, Java, C/C++, SQL

Testing: Unit & Integration Testing, Jest, Postman/API Testing, Debugging & Issue Resolution

Deployment & Tools: Git, GitHub, Docker, Vercel, AWS EC2, AWS S3, CI/CD basics

AI/ML/DL & Tools: Machine Learning, Deep Learning, LLM API Integration (Gemini, OpenAI), LangChain, AI-Assisted Development (Claude, Cursor, Copilot, ChatGPT)

Experience

Software Developer Intern **June 2025 – July 2025**
NTS Nihon Global *Remote*

- Built full-stack web application modules using **React.js** (client-side) and **Node.js/Express.js** (server-side), implementing reusable UI components and improving data flow and reporting workflows.
- Integrated **RESTful APIs** with a **MongoDB** database, JWT authentication, and structured validation; debugged issues across the stack to ensure reliable data exchange.
- Collaborated with the development team using **Git/GitHub** in an Agile environment, supporting testing and deployment through sprint reviews and release documentation.

Projects

Local Trade Street – Business CRM | ***React Native (Expo), TypeScript, Express.js, MongoDB*** GitHub

- Building a full-stack mobile CRM with **Expo React Native + TypeScript** frontend and **Express/TypeScript/MongoDB** backend across 8 modules (OTP auth, business profiles, leads, reviews, subscriptions, analytics), writing modular, testable code across structured build milestones.

Crowdsourced Civic Issue Reporting System | ***React.js, Node.js, Express.js, MongoDB, JWT, Leaflet.js*** GitHub

- Built a full-stack MERN platform with **React.js** responsive dashboards and **Express.js REST APIs**, implementing JWT role-based auth for Citizen, Worker, and Admin roles, plus MongoDB analytics endpoints and Leaflet.js geo-tagged mapping.
- Used AI tools (Claude, ChatGPT) to debug API issues and apply clean architecture patterns; deployed on Vercel with Cloudinary integration.

AI Traffic Management System | ***Python, YOLOv8, OpenCV, FastAPI, React.js, Socket.IO*** GitHub

- Built a real-time computer vision system using YOLOv8 and OpenCV for vehicle detection, lane-load estimation, and emergency vehicle identification.
- Integrated **FastAPI, React.js, and Socket.IO** to stream real-time analytics through an interactive dashboard, and designed adaptive signal-control logic evaluated across varied density and lighting conditions.

AI App Compiler | ***Python, FastAPI, React.js, SQLite, Gemini/OpenAI API*** GitHub

- Built a 7-stage AI pipeline with a **React.js** monitoring frontend that converts natural language prompts into validated app configurations, using a 10-rule validation engine and LLM repair loop; logged latency, success rate, and repair counts to SQLite for systematic testing.

Achievements & Certifications

- **Consistent Daily Practice:** Solve DSA daily (**200+** on LeetCode) and build/test full-stack features daily, while expanding into AI/ML/DL through applied projects.
- **NPTEL Elite+Gold** – Machine Learning & Deep Learning; **NPTEL Elite** – Programming in Java; **AWS Academy Cloud Foundations Badge** (2026).
- **1st Place** – National-Level 36-Hour Hackathon (AI project); **2nd Prize** – National-Level DSA Competition.
