Summary

Final-year B.Tech Computer Engineering student (graduating 2027) passionate about building **AI-powered full-stack applications** using **React.js, Next.js, Node.js, FastAPI, and LLM/AI APIs** (Gemini, OpenAI). Hands-on experience integrating **AI pipelines, chatbot logic, and automation** into real-world web applications. Actively uses **Claude, Cursor, and Copilot** for AI-assisted development. Prior remote internship delivering production full-stack modules. **NPTEL Elite+Gold** certified in ML & Deep Learning.

Education

Government College of Engineering, Jalgaon

B.Tech in Computer Engineering

2024 – 2027

CGPA: 8.05/10

ICRE, Gargoti

Diploma in Computer Engineering

2021 – 2024

80.81%

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Web Design, Reusable Components

Backend: Node.js, Express.js, FastAPI, Django, REST APIs, WebSockets, Socket.IO, JWT Authentication

AI & LLMs: LLM API Integration (Gemini, OpenAI), LangChain, AI Pipelines, Chatbot Development, Prompt Engineering, Automation Workflows

AI Tools: Claude, Cursor, GitHub Copilot, ChatGPT (daily development use)

Databases: MongoDB, MySQL, SQLite, Mongoose ODM

Languages: JavaScript (ES6+), TypeScript, Python, Java, C/C++, SQL

Tools & Cloud: Git, GitHub, Docker, AWS EC2, AWS S3, Vercel

Experience

Full Stack Developer Intern

NTS Nihon Global

June 2025 – July 2025

Remote

- Developed **React.js** frontend modules with reusable components integrated with **Node.js + Express.js** REST APIs; improved backend data flow and reporting workflows in a production environment.
- Built backend APIs with **JWT authentication** and structured validation; ensured reliability, performance, and security of data pipelines.
- Collaborated with the development team via **Git/GitHub** in an Agile environment; participated in sprint reviews and release documentation.

Projects

AI App Compiler | Python, FastAPI, React.js, Gemini/OpenAI API, LangChain, SQLite

GitHub

- Built an **AI-powered full-stack application** that converts natural language prompts into validated app configurations via a 7-stage **LLM pipeline**: Intent Extraction, Schema Generation, Validation, Repair, and Runtime Simulation.
- Integrated **Gemini/OpenAI APIs** with a targeted **LLM repair loop** and 10-rule validation engine; automated error correction to improve output reliability and reduce schema failures.
- Logged latency, success rate, and repair counts to SQLite; built **React.js** frontend to visualize pipeline results and AI-generated outputs in real time.

AI Traffic Management System | Python, YOLOv8, FastAPI, React.js, Socket.IO, OpenCV

GitHub

- Built an **AI-integrated full-stack system** combining YOLOv8 computer vision with a **FastAPI** backend and **React.js** dashboard; streamed real-time AI model outputs via **Socket.IO WebSockets**.
- Designed **automation logic** for adaptive signal control decisions based on AI-detected vehicle density and emergency vehicle identification.

Crowdsourced Civic Issue Reporting System | React.js, Node.js, Express.js, MongoDB, JWT

GitHub

- Built a **MERN full-stack** platform with **React.js** responsive dashboards, **Express.js** REST APIs, **MongoDB** data models, JWT role-based auth, and Cloudinary integrations; deployed on Vercel.
- Implemented analytics endpoints tracking resolution time and issue volume; integrated Leaflet.js for geo-tagged location mapping across user roles.

Achievements & Certifications

- **NPTEL Elite+Gold** – Machine Learning & Deep Learning (neural networks, model evaluation); **NPTEL Elite** – Programming in Java; **AWS Academy Cloud Foundations Badge** (2026).
- **1st Place** – National-Level 36-Hour Hackathon (AI project); **2nd Prize** – National-Level DSA Competition; Solved **200+** DSA problems on LeetCode.
- Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, Machine Learning, Deep Learning.
